PREMIER

*Coming Out With
A New Technologies*

WE ALSO MANUFACTURE :

DRYERS

SIFTER

MIXERS

PULVERIZER

MULTI MILL

HAMMER GRINDER

MULTI MILLS FOR AYURVEDIC MEDICINE

MASS MIXER

Out standing features:-

- The drum of the mixer is fully made of food grade stainless steel.
- This machine is used to mix any type of powder in order to create a perfect blend of any kind.
- Blades of the mixer rotate in both reverse and forward direction for mixing the material in a perfect form.
- Mixing drum and blades are made out of good stainless steel to avoid any kind of chemical reaction.
- The blades inside the drum are fitted in such a way that any type of Powder blends into proper form.
- Very easy cleaning process
- User friendly.
- It drives on 2 hp to 5 hp motor with gear box.

SIFTER

Out standing features:-

- All the touching parts are made out of high quality stainless steel.
- Offers more throughout capacity per screen area than conventional screening equipment.
- Changing and replacing screens take minutes.
- By changing the screen you can get the product as per your satisfaction.
- It can be used for separation of 100 microns to several millimeters with production
- Very easy to disassemble for cleaning.
- The machine is used for sieving costly medicines, spices, powder products, colours etc.
- USER FRIENDLY.
- It drives on 2 hp to 3 hp motor.
- There are two sizes of centrifugal.(1) (2)

TRAY DRYERS

Out standing features:-

- Dryers are made out of double wall iron frames, filled with rock wool slap and the chamber are made out of mild steel.
- Specially designed control panel ensure easy operation to the machine.
- Electric heaters are placed in such a way to give adequate balance heat in chamber.
- Control the temperature of baking and drying on different products as per requirement.
- Trays are made of aluminum and stainless steel both as required.
- Dryers are available in different sizes, 12 trays, 24 trays, 48 trays.

DISINTEGRATORS

Out standing features:-

- Main body is made of mild steel or stainless steel according to the nature of grinding material.
- Has hammers and different type of screens, which break lumps into a required size.
- The center feed distributes product evenly across the screening and hammers area.
- Shaft is made of mild steel fitted with discs having hammers.
- The outboard bearing design and dual "O" rings seals on the dustproof housing with heavy-duty roller bearing.
- Breaks the lump in a equally sizeable output.
- It drives on 5 hp to 10 hp motor.
- Available in different sizes as per production.

PIN MILL

Out standing features:-

- Pin Mill is made of good quality mild steel.
- This pin mill is used only for sugar grinding.
- It is a small impact sugar pin mill, which gives high production.
- The shaft of the pin mill is directly attached to the motor to get higher RPM.
- It has fixed blades inside the chamber, which rotates circular to grind the sugar.
- Few sugar pin mill has no vibration no noise ensure good environment to work.
- User friendly machine.
- It drives on the 2 hp to 5 hp motor.

COATING PANS

Out standing features:-

- The pan is fully made of food grade stainless steel.
- This machine especially made for powder coating on tablets, confectionery items etc.
- The pan rotates in circular direction at a selected speed so that coating is done to its perfection.
- Pan is made out of food stainless steel quality to avoid any kind of chemical reaction.
- Specially designed control panel ensures easy operation to the machine.
- Very easy cleaning process.
- User friendly.
- It drives on the 2 hp to 5 hp motors with gear box.

CONICAL MIXER

Out standing features:-

- The drum of the mixer is fully made out of food grade stainless steel.
- This machine is used to mix any type of dry powdered item in order to create a perfect blend of any kind.
- The drum of the conical mixer rotates both reverse and forward direction to bring the material up and to perfect mixing.
- Drum and blades are made out of good quality stainless steel to avoid any kind of chemical reaction.
- Very easy cleaning process.
- User friendly.
- It drives on 1 hp to 3 hp with gear box

RIBBON BLENDER

Out standing features:-

- The drum of the mixers fully made out of food grade stainless steel.
- This machine is used for mixing powder or other such items in order to create a perfect blend of any kind.
- The drum of the mixer rotates both reverse and forward direction.
- Material inside the drum goes up and down as the drum moves.
- The blades inside the drum are fitted in such a way that any type of powder blends into a proper form.
- Mixing drum and blades are made out of good quality stainless steel to avoid any kind of chemical reaction.
- Very easy cleaning process.
- User friendly.
- It drives on the 2hp to 5 hp motor with gear box.

HAMMER GRINDER

HAMMER TYPE MILL (GRINDER) IS AVAILABLE IN THESE SIZES

12"15H, 14" 30H, 14" 24H, 16" 36H, 16" 24H, 18", 20" 24", 30";

Save Power Time & Money

PREMIER ENGINEERING WORKS

PEW Introduction

With our high technical expertise, we are able to offer the best price economy products with the best return of the investment at the earliest to the customers.

PEW Services

We have a different approach of customer services. We don't provide maintenance services only to the customers, but we also provide the best continuous consulting services needed to the customers right since the start of the bargain making our customer relationship stronger with the course of time.

Pew R&D Department

We always keep our eyes open and remain well-informed about the technical advancements achieved all around. Our modern R&D department having the latest equipments and highly qualified professionals ensure innovations before the time. Ultimately, our products provide complete customers, satisfaction always.

Grinding Applications

All types Spice (Haldi, Amchur, Red chilled mirch), all type of herbs, Besan, Chemicals, Metal Slag, Soap, Stone, Lime Stone, Asbestos, China Clay, Gypsum, Chalk, Coal, Marble, Sandal Wood, Graphite, Tamarind Seeds, Mica Chips, Chromite, Dolomite, Carbon Black, Hydrated Lime etc...
